

ASX Release

JAYEX UK – PORT OF DOVER CONTRACT UPDATE

Melbourne, Australia; 24 March 2016:

Jayex Healthcare Limited (ASX:JHL) (**JHL** or **Company**) made an announcement on the 15 January 2016 pertaining to successfully securing a digital signage contract with Port of Dover Authority in the UK. The contract was for an order of 8 Digital Signage units, the delivery schedule of which was broken down into two streams: an initial single screen and then the remaining 7 digital signage screens.

The Company has successfully delivered the first stream of the contract and received revenue of £147,058 for this first screen delivery.

The Port of Dover has subsequently varied the original contract specification requirements. This variation has resulted in the order for the second stream of 7 digital signage screens being cancelled. The Port will conduct a re-tendering process to fulfil this order, in which Jayex UK will actively participate.

Remarking on the variation of the original contract order, JHL Executive Chairman Michael Boyd commented, "It is important to note this contract falls outside the core activity of the Group and any benefit from the signage contract is opportunistic and above normal operating expectations. We expect to release our Audited 31 December 2015 Financial Statements in the coming week. In addition to this a quarterly update will be provided in April which will contain more detailed information on the performance of the Group."

About Jayex Healthcare Limited - www.jayexhealthcare.com.au

Jayex Healthcare is a leading provider in the United Kingdom and Australia of integrated healthcare services delivery platforms, incorporating the Company's four interconnected and proprietary technologies, being:

- the *Enlighten* patient workflow platform;
- the *Appointuit* patient engagement solution;
- the *Pharmacy Delivery 2 U* prescription delivery service ; and
- the *BluePoint*® remote pharmacy prescription processing and dispensing terminal.

Jayex offers 24/7, online, interconnected '*end-to-end*' and '*state-of-the-art*' healthcare service delivery platforms for:

- Patients – particularly the “time-poor”, the elderly and chronically ill who would likely benefit from better quality and more convenient healthcare services; and
- GPs/Healthcare professionals, clinics, pharmacies and hospitals – particularly those who want to deliver better healthcare services and enhanced patient well-being, more efficiently and at a lower cost, while at the same time, having the potential to increase their productivity, efficiency and profitability.

The Jayex technologies are designed to meet the demands and expectations of patients, GPs, AHPs, clinics, pharmacies and hospitals in today's market, and has the versatility and flexibility to accommodate future demands.
